GEOTECHNOLOGY WORKSHOP

One of the main factors can affect the cost of construction projects

- A. Choice the right sites
- B. Know the soils and geology to support the foundation
- C. How to do construction on different types of soils and geology

The workshop will discuss what project teams should know of the biotechnology on the project, including architects, structural engineers, the construction contractors, the developers and the owners. The workshop will discuss with common case studies in San Gabriel Valley, San Gabriel Mountain, LA Downtown Area, Downey, Lynwood, Cerritos Areas, Puente Hill Areas, Long Beach Area.
